

## Sprint 1 Report

Product Name: LocSilence

Team Name: LocSilence Team

Date: 10/22/17

### **Actions to stop doing:**

- We are completely satisfied with our current process.
- We have had three scrum meetings a week (MWF) right after class (9:10 am). This is the perfect amount of time for us to get tasks done between meetings.
- Our scrum meetings last 15 minutes, and (since this is our first week, we're still determining the architecture, and we're both the dev and management team) afterward usually leads into a few extra minutes of new features we've thought of adding, or ui implementations etc.
- Overall each member of our team has a great work ethic and is generally excited to get opportunities to tackle each task, which makes each member reliable and contributes to an overall great morale in the LocSilence team.
- We are also very organized by using a google team drive for collaboration on documents, github for collaboration of code, and a Facebook group chat for instant communication.

### **Actions to Start doing:**

- Giving people more tasks, we wanted to start off cautiously but now that we know the team's workload capacity, we can push to do complete more story points per sprint

### **Actions to keep doing:**

- Meeting 3 days a week (although we now meet on Thursdays to accommodate the TA)
- Maintaining a fenced 15 minute scrum, leading into a management/architecture meeting
- Accommodating each other's schedules
- Keeping the team drive and github organized
- Communicating consistently through the group chat

### Work Completed:

The scrum board and backlog were planned accurately and every task/user story on our sprint 1 board was completed

### User stories:

- As a user, I want LocSilence to store locations that I enter into the search bar, so that they can be silenced for me
- As a user I want to easily see which locations I have selected to be silenced in a listed format, so that I can easily see where my phone will be automatically silenced, at locations all over the world
- As a user, I would like an intuitive taskbar so that I can navigate easily through the app

### Work Completion Rate:

- User stories: 3 (split into 13 tasks)
- Ideal work hours: 30
- Sprint days: 14
